

AREA SUENA

Tomorrow's professional Audio Solutions, today.

AREA SUENA

Audiovisual integration

Distributors and importers

Professional Audio consulting

Experience

Area Suena was created in 2009 as a result of the business concern of a group of professionals with extensive formation and experience in the engineering, sound, music and computing areas. Since the beginning, our purpose has been constantly introducing world-class brand new professional audio technologies to the Spanish sound engineers and producers.

Nowadays, AreaSuena is one of the most prominent and consolidated professional audio equipment distributors and system integrators for the audiovisual sectors, sound recording studios for film, music, post-production, dubbing studios and in the Broadcast market.

Identity

Our integration historical includes many works for the main Spanish Broadcasters and all kind of recording studios, due to which our positioning in the audio scene is something we are really proud of.

Furthermore, collaboration with Universities and Institutes is key for us we strongly believe they are the main engine for industry's future and a essential part of the profesional market, specially for introducing new products

Our main customers

Honesty

Our distribution style consists in protecting and caring our products, as we deeply believe on them so that we just sell them honestly. From a small demo "one to one" to a public international audio trade show, we take care of every aspect.

We were pioneers bringing to Spain products like the Euphonix consoles (developer of the renowned Eucon), as well as the firsts Dolby E encode/decode softwares of Minnetonka Audio.

We area also the most certificated Avid distributors: ACSR (Avid Certified Support Representative) and certified instructors ACI (Avid ProTools Certified Instructors) as well.

As a top-class distribution company we care not only about marketing but also about every technical aspect of our products and teach them to every customer.

Our main brands

Innovation

We always seek new technologies to bet for. It is important to keep our customers gear updated and we take the responsibility to show them the convenience of adding any new asset that may optimize their workflow and profitability.

Our everyday language

Trust

Our staff includes Support Specialists and Specialized Technicians with many years of experience in all types of audiovisual systems, all the necessary tools and technical resources, as well as the invaluable support of manufacturers to efficiently develop and carry out any project of engineering of any size and complexity.

More than 10 years after creating the company, we keep on growing side by side with our customers and following our main purpose:

Keep spanish professional audio at world-class level.
